SM HIMSON HOT AIR STENTER
MODEL "SUPER e-CON 2200"

MANGLE
TWO BOWL PADDING MANGLE/ TWO BOWL
TWIN PADDING MANGLE / THREE BOWL
PADDING MANGLE

- A new concept of two bowl twin padding mangles
- Ideal for padding two non compatible chemicals in separate throughs
- Reduces variation in finishing
- Fabric accumulator between mangles
- Tension control system between mangles
- Vertical/Horizontal design padding mangles in dual or solo operations
- Pneumatic through lifting system (Optional)
- Tension Control system with load cell (Optional)
- SS Cladding from inside of structure frame(Optional)

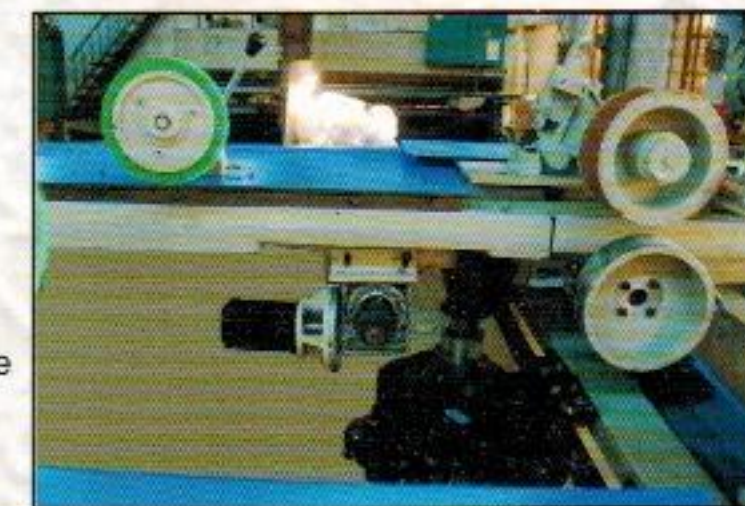

BOW AND WEFT STRAIGHTENER

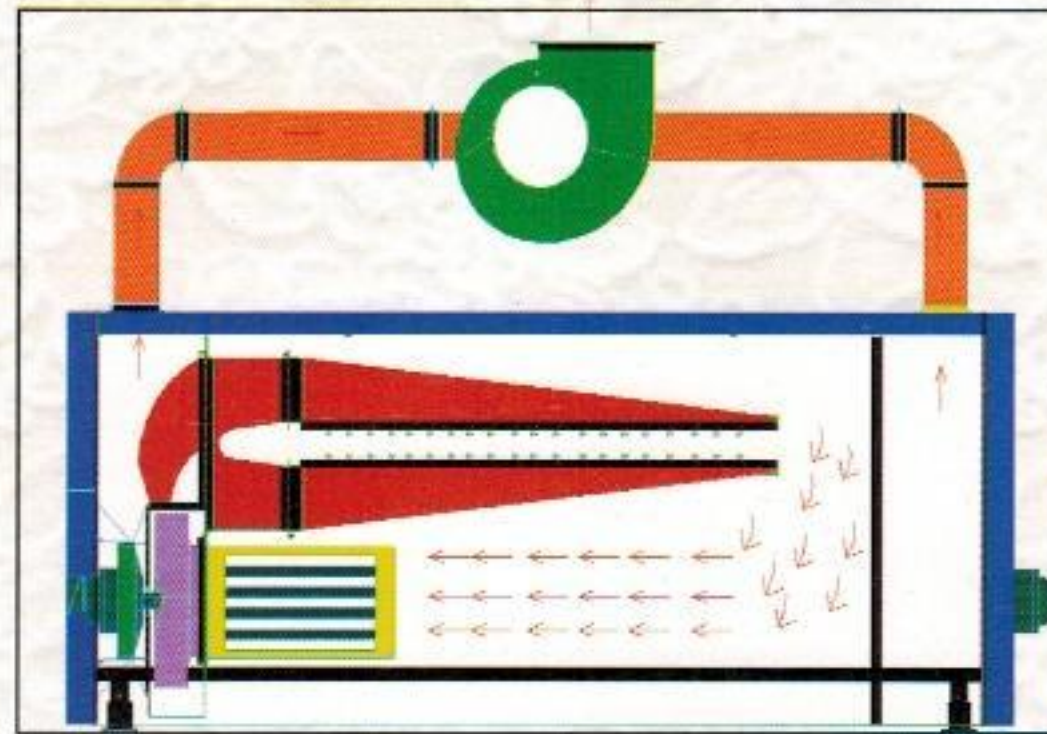

- Two rollers for Warp connection
- Four rollers for Weft connection
- Suitable for all symmetrical/ Geometric design
- Suitable for printed/ colored woven/ knit fabrics
- Electro Mechanical push button system
- Fully automatic Bow & weft adjustment with Electronic sensors(Optional)
- Inlet Desk
- E+L Infeed Device & E+L Cloth Guider.
- Operating station with Touch Screen for ease of operation
- Center Fabric support for Heavy Fabrics. (Optional)
- Heavy duty construction for Vibration free operation.
- Motorised Scroll Roller
- Pneumatic operation of Pin On device.

Infeed Devices

- Over Feed, Fabric Tension, Selvage Tension devices are independently controlled by inverter with the controlling range from -10% to +40% (Optionally from -20% to +40%)
- AC Servo Drive for Over Feed & Selvage Tension for accurate overfeeds during start & stops (Optional)

**Delivery Desk**

- Sturdy Construction of Outlet desk ensures noiseless machine operation
- Splined shaft drive transmission for best Transmission Efficiency.
- Cooling Cylinders (Optional)
- Weft straightner for geometrical design correction (Optional)
- Plaiter with Big Batching option with independent motor.
- "J" Scray (Optional)
- Operating station with Touch Screen for ease of operation.

HOT AIR STENTERS

FOR FABRIC WIDTH FROM 1200 MM TO 4200 MM
& FROM SINGLE CHAMBER TO TEN CHAMBERS.

AUTOMATION

Process Parameter Visualisation & Control System

The PPVC system developed by HIMSON is unique & is at par with the system that is being offered by the European Manufacturers. The system consisting of Hardware & software

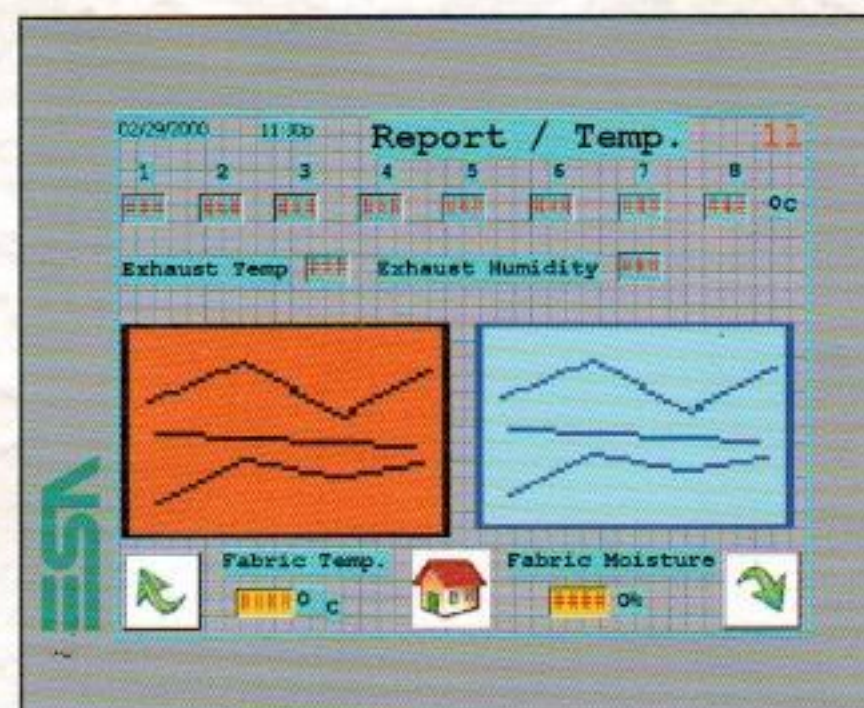

A 10.4 Inch color Touch Screen MMI is used on the machine on the Feeding Desk & 7" Touch Screen MMI on Delivery Desk. The MMI will have True time values that are related to the device.

Our PPVC system can be integrated in the Machine as per customer's requirement for the process data acquisition & control. The PPVC system is a complete PROCESS AUTOMATION SYSTEM for the stenter in Modular Pack.

Due to recipe management in our PPVC system the quality of the fabric finished or dried has the consistency. The recipes can be programmed by the mills technicians as per the process requirement.

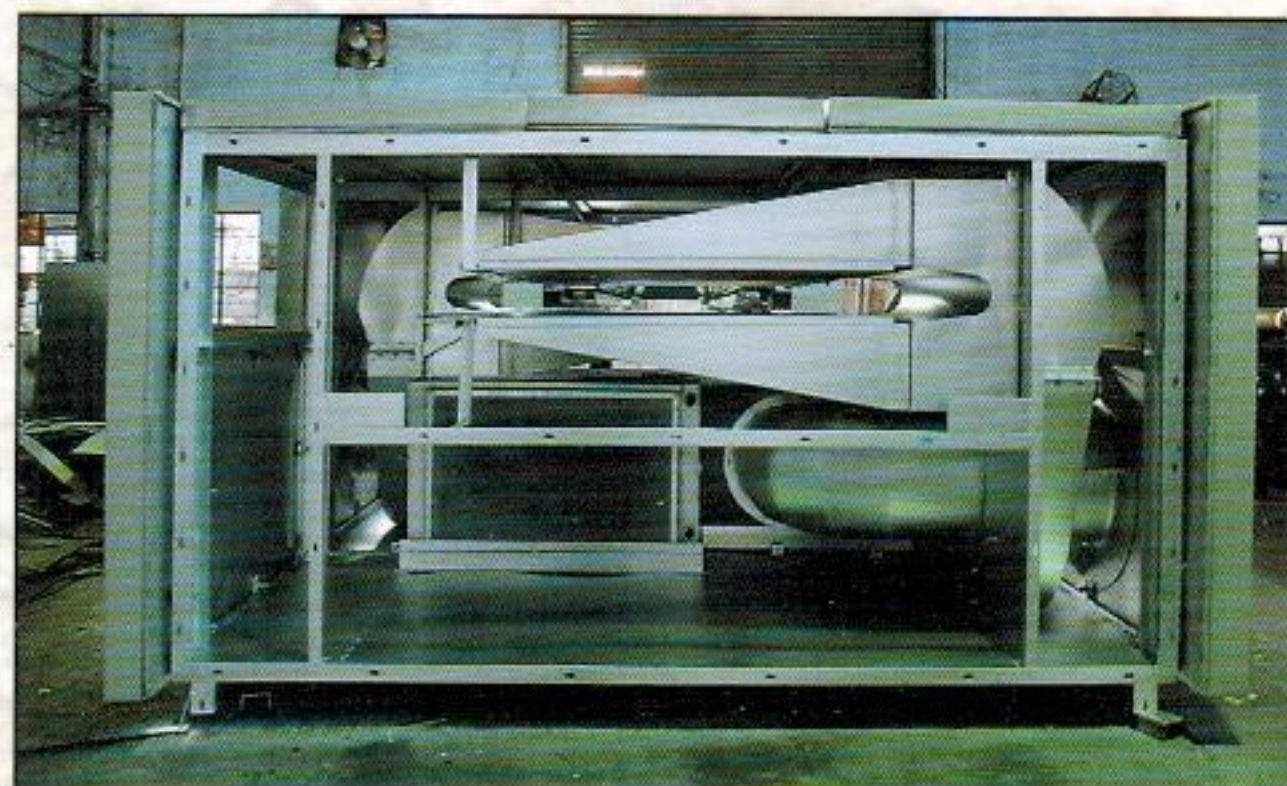

The PPVC system Controls all Process Parameters like Tension, Temperature, Moisture, Humidity, Power Consumption, Blower Motor speed, Production Data in the Full Version Pack.

Our PPVC system also keep the record of all the Faults in the Electrical system occurs. & the record can be checked on line any time.

SM

Himson

* Hot Air Chamber

- * Closed Circuit High Efficiency Chamber design.
- * 3 meter chamber length.
- * Designed to prevent fresh air mixing after radiator.
- * Excellent energy conservation due to innovative design
- * Unique designed radial fans
- * The unique designed perforated nozzles, which impart higher velocity due to reduced nozzle area at no extra cost
- * Choice of Heating Media Steam / Direct Gas/ Indirect Oil/ Electrical Heating System
- * Radiator of 84/94/130 Tubes as per customers requirement.
- * Highest Air Velocity of Hot Air On Fabric with 5 HP Motor than any other Machine.
- * Lowest Radiator to fan distance increase the Heat Transfer Efficiency
- * Easy Access in the chamber for cleaning Purpose.
- * Individual Plug In type Nozzles.
- * Side Insulation panel of 125 mm/ 150 mm with 92 Kg/Cm³ density Rock Wool
- * Filter cleaning in Situ condition.
