Key Textile Accessories Pvt. Ltd.

About us

Initiation

Key brand had been one of the leading manufacturers of Flat Healds and Drop Pins for over sixty years. They were Established in 1952, The National Wire Heald Works Pvt. Ltd.,(NWHW) were India's largest and most reputed manufacturer of Flat Healds and Drop pins. Founded with the mission to deliver the best to the textile industry, they had etched out a distinct image as a Healds and Drop pins manufacturer to become a preferred choice in the Indian Textile Industry.

Acquisition

The National Wire Heald Works Pvt. Ltd.,(NWHW) initially started with the production of Twisted Twin Wire Healds for Shuttle and Power Looms under the brand name "KEY". To cater to the growing market needs, they went on to manufacture all types of Flat Steel Healds - Simplex / Duplex in 'C' / 'J' / 'O' types for Shuttleless Weaving Machines and Drop Wires.

The Plant is now taken over by the two well known families of Surat, R S. Bachkaniwala led Himson Group and Suratwala's of C.B. Suratwala & Sons. The plant is based at Kim near Surat and the factory is spread over 10,000 sq ft.

The Key brand Stainless Steel Flat Healds and Droppers unsurpassed quality will now be available as in the past and with the help of new technology we are still trying to improve the products day in & day out. And both Healds and Droppers are manufactured only from Imported Stainless Steel Strips of Grade AISI 420 / 403H.

Inspection Process

The Seven stage intense inspection processes make all of our products precise by dimension, shape, Shininess, burr less etc. The inspection is done on every stage of production. The detailed inspection processes done to give you a better and quality product than in the market.

Key to Better Weaving

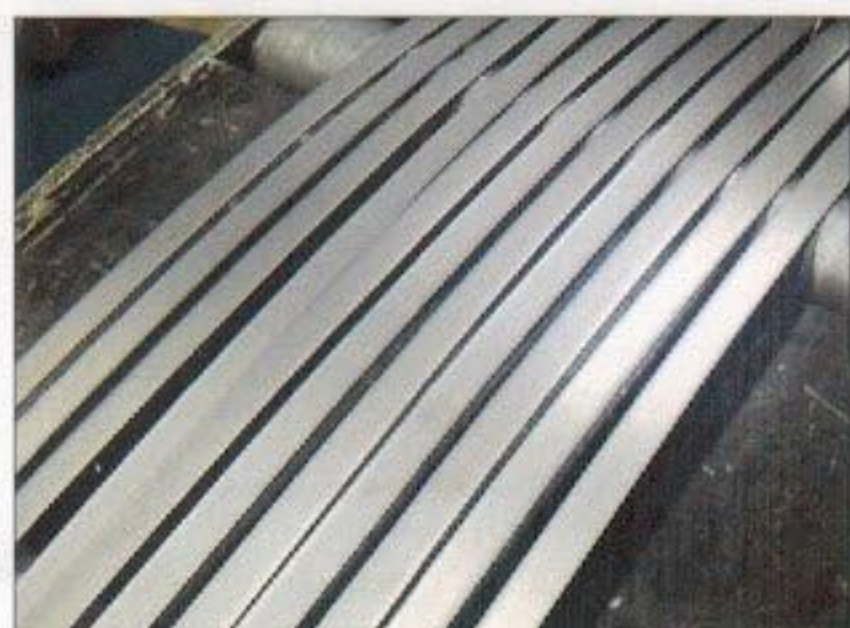

For more than 60 years Key Brand® have had a strong practice in designing and manufacturing the best quality headdles for superior weaving. Our consistent and determined efforts in improving the design and manufacturing practices have enabled us to remain the most prominent brand of Headdles & Droppers in the market. Key Brand's own in-house developing and exclusive polishing techniques guarantee maximum abrasion resistance, life, speed and strength of our weaving accessories. Key Brand® offers best solutions to meet your demand for systematic and better quality weaving. Key Brand® doesn't only have unique values, but its accessories have best quality finish, we offer value for money and the products are available in short time period. Our products are best combination for better weaving.

Our Vision

To be the leader as a designing and manufacturing the best quality weaving accessories for superior weaving solution provider and influence growth and development of businesses that makes use of our products and services.

Mission Statement

To delight our customers by offering innovative, world class and technologically superior products, that becomes the benchmark in the industry.

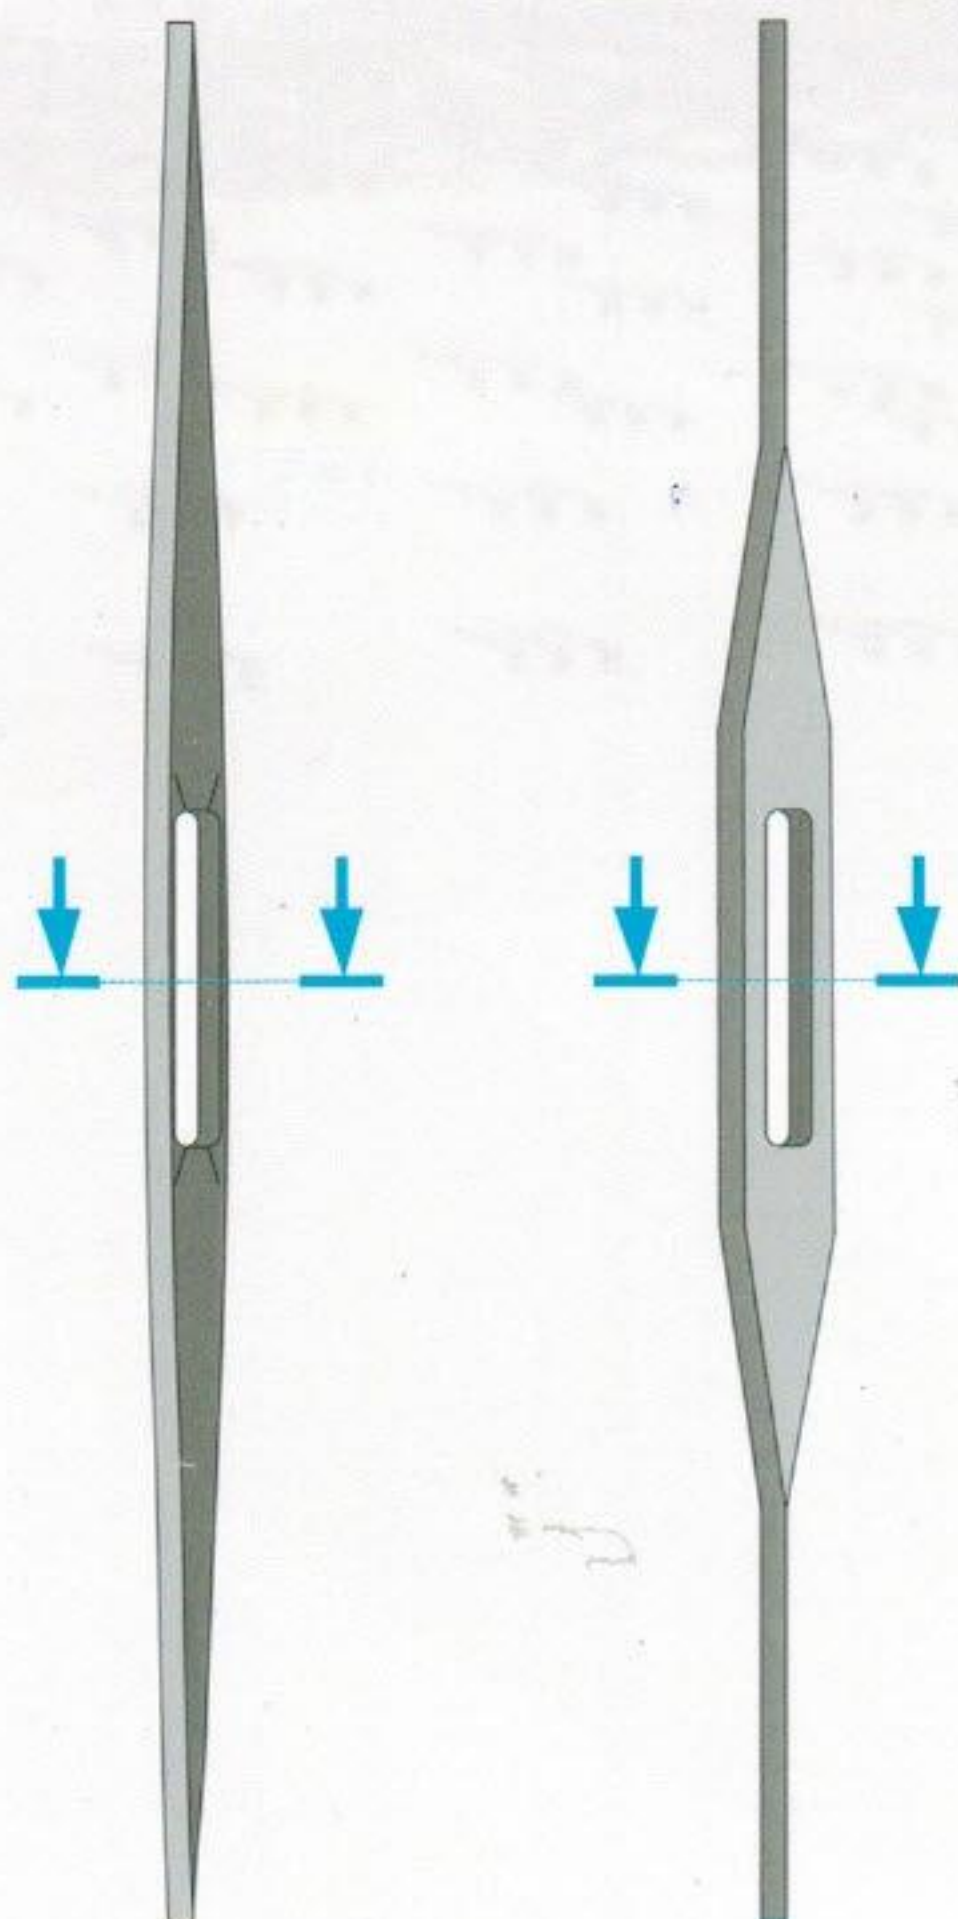

Finest Raw Material

Our team of technical experts and our experience, and we make sure that the best quality of raw material is selected for each application. Hardened and tempered stainless is a durable choice for high-speed weaving conditions. The material we use withstands best, the yarn cutting the heddle eye. Whereas non-tempered steel heddles provide a reliable, cost-effective answer to corrosion issues, especially for water jet weaving machines.

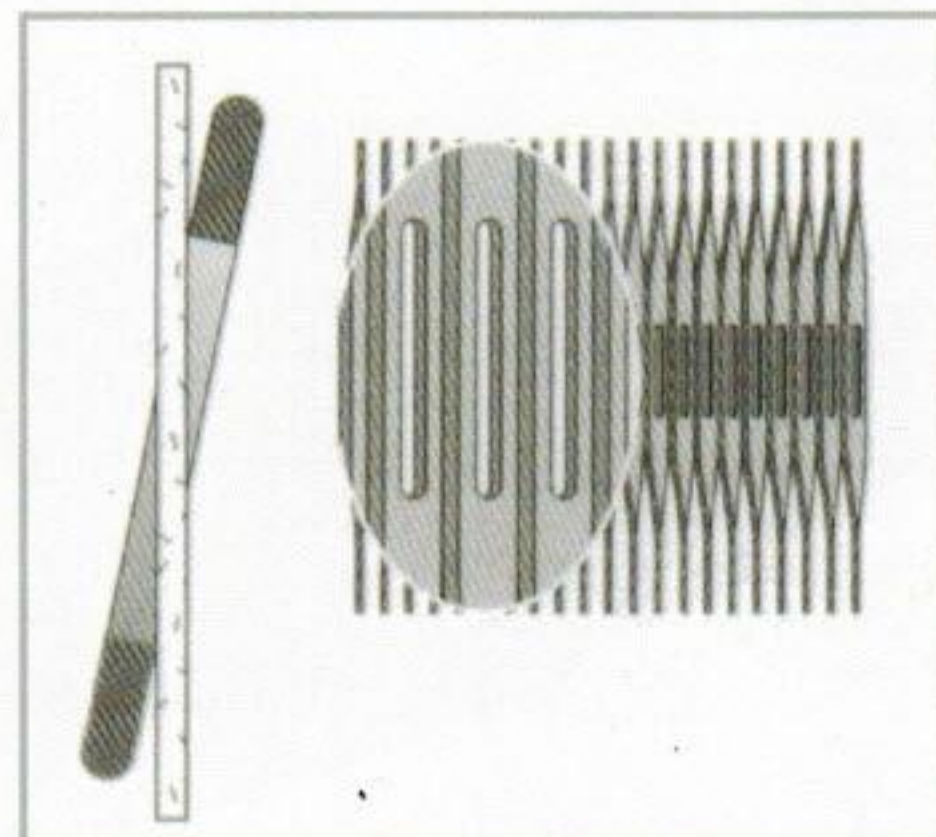

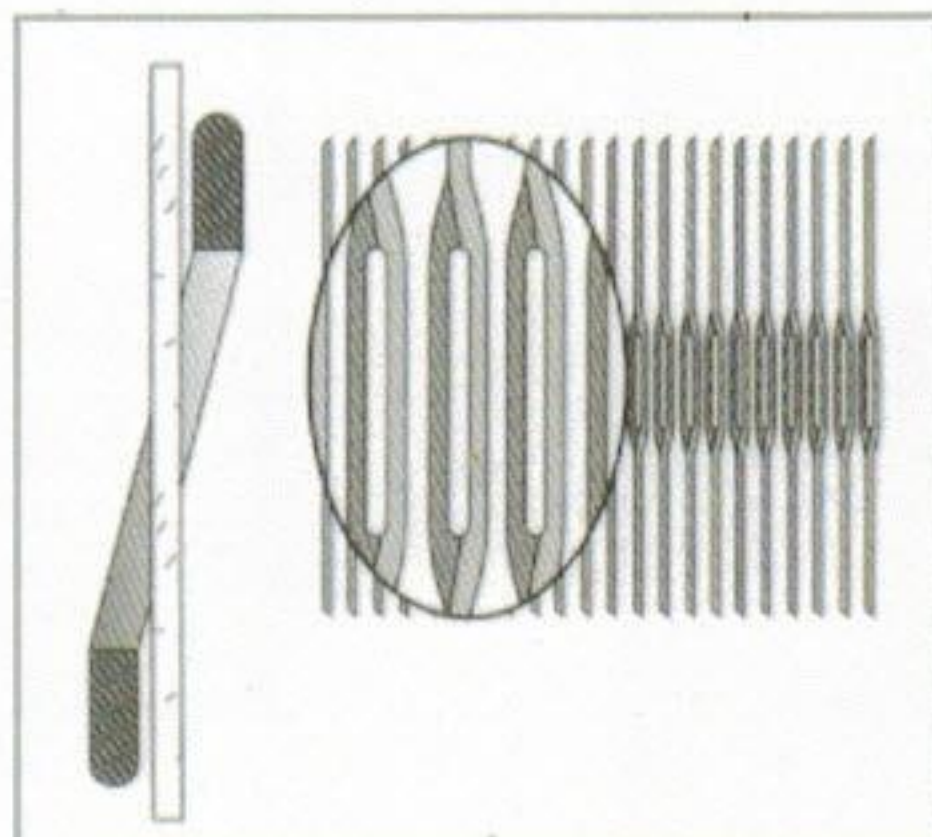

Ultimate Deburring

For most delicate fabrics our best quality of deburring can be the ultimate solution. Through our top of the range of polishing process, the surface of the complete heddle become high quality polished to treat the most delicate and finest yarns.

Key - Eye®

Key Brand® revolutionised the thread eye with the Key Eye®. This patented engineered design allows unrestricted yarn passage, and intensely reduces friction between the yarn and heddle. It guarantees increased air space between heddles and upto 30% more heddle density per cm. All contribute to higher loom speed, decreased yarn chaffing, fewer heddle frames and reduced energy intake. Good reasons to specify Key Eye® heddles. Compatible with the top of the range best quality high speed drawing-in machines, Key Eye® is providing very successful on a wide variety of fabric styles woven on rapier, water jet and air jet weaving machines.

Choosing the most appropriate Drop pins

When we select drop pins, we have to consider the type of stop motion, weight, length and entering requirements. The drop pin should be heavy enough to trigger the stop motion when a warp end breaks, but not so heavy that excessive strain is put on the yarn. If we give an example, a fuzzy yarn which could produce tight-fitting may require a drop pin with more weight to properly activate the stop motion then a smooth yarn of the same count.

Why to use Key Brand® Drop Pins

- Ability to supply the correct drop pins.
- Manufactured from best quality hardened and tempered stainless steel.
- Stops instantly due to breakage warp yarn.
- Can be used in any auto drawing in machine.
- Manufacturing process used is best in class punching, cutting and polishing techniques.
- Intense inspection on every stage of manufacturing to maintain high quality and standards.

Raw Material : Hardened and tempered stainless steel Drop pins Appearance

Stainless Steel: Best resistance against corrosion due to yarn finishes, humidity and ultrasonic cleaning. Best recommendation for all applications. Especially for high speed weaving, delicate and top quality yarns, Compulsory for water jet weaving machines.

We are expertise in offering
precision and superior quality products.
